

Wazuh and Agent Deployment Project Snapshots:

The screenshot shows a terminal window titled "Install RELEASE" running on a Ubuntu system. The terminal displays a log of Wazuh installation steps, starting with configuration file generation and moving through certificate creation and indexer installation. It ends with a warning about a missing command ("gpg-dearmor") and a successful curl command to download a GPG key. The terminal also shows the output of the "df -h" command, which provides a detailed view of the system's disk usage across various partitions.

4 updates can be applied immediately.
To see these additional updates run: apt list --upgradable

Enable ESM Apps to receive additional future security updates.
See https://ubuntu.com/esm or run: sudo pro status

New release '24.04.3 LTS' available.
Run 'do-release-upgrade' to upgrade to it.
